3. *Ta* avoid a hazard due to instability of the appliance, it must be fixed in accordance with the instructions.

SPECIFICATIONS

Model	WD-1103-22L-WH
Voltage - Frequency	220-240V - 50/60HZ
Heating power	500W
Cooling power	65W
Water heating capacity	5.0L/h
Water cooling capacity	1 .OL/h
Electric shock prevention	Type I

SCHEMATICS

NOTE: If any techmeal data or the circuit diagram has been changed, this manual may not reflect those changes

ATTENTION

1. Make sure that there is hot water from the hot water faucet before plugging in and switching on the appliance to ON to heat. If the water cooler is turned ON with an empty water tank, it can be damaged.
2. When moving the water cooler, do not tilt more than 45° to avoid damage to compressor.
3. Always install the water cooler indoors, on a flat surface and at least 15cm from the back wall.
4. Keep the appliance away from high temperatures and placed in a dry and ventilated area. Never install the water cooler in open air, in rain or under direct sunlight.
5. Children should not be allowed to use the red hot water tap.
6. If the water cooler is not to be used fora long period, unplug it and drain all water inside it away.
7. Before first use or after a long period of non-use, the water tank and water pipes should be cleaned. If possible, they should also be disinfected. The first batch of heated water should be discarded. When draining the system, turn the heating switch to the OFF position.
8. Wash and disinfect the system every 3 to 6 months with a suitable cleaner and according to its instructions for use.
9. Do not pull on the power cable to unplug. Do not turn ON or OFF the appliance by connecting or disconnecting it from the power source.
10. Do not clean the inside of the water cooler with water to avoid electric hazards. Clean it with
